

CENTRAL COAST

Envirowalk Grating has been supplying our FRP **EnviroMesh** & **EnviroTreads** for many projects throughout the Central Coast of NSW coast since 2009.

Central Coast Council (Previously Gosford City Council) has maintained confidence in Envirowalk quality and service for many years and still continues to do so: The Photos at right show the Davistown shared walkway 3 metres wide x 550 metres long - just one of several major projects where Council has successfully used **Envirowalk Mini EnviroMesh** panels and our **EnviroTread** stairs and other **EnviroTread** Safety products.

The Woy Woy elevated track (Bottom right) is another large project employing **Envirowalk** products but there have been countless other smaller projects such as the small Council jetty (bottom left) where Council have trusted consultations with **Envirowalk** and used our products

All **Envirowalk** FRP **EnviroMesh**, **EnviroGrate** and **EnviroTreads** are manufactured using only premium grade, unblended Type I (Iso) resin, ATH filler, maximum anti-UV, E-Glass fibres & fine grit P5 rated anti-slip surface.

Envirowalk PRODUCTS USED:

H30 (30mm thick) Mini and Micro **EnviroMesh** panels Type I resin, 10g UV9, ATH filler, E-Glass fibres with fine carborundum barefoot friendly grit anti-slip surface.

H40 (30mm thick) Mini and Micro **EnviroTread** steps and custom safety landing panels Type I resin, 10g UV9, ATH filler, E-Glass fibres with fine carborundum barefoot friendly grit anti-slip surface.
